Date : 03-05-2024

Internal Guide	**Head of the Department**
Mr. Shamsagazarzoo Alam Subject Co-ordinator C.T.O. Ally Soft Solutions	Prof . C. D. Parmar Head of Department ICT Engineering

Abstract:

- The food donation website is like a superhero fighting against two big problems: food waste and hunger. It's like a big online store where people who have extra food can give it to those who need it. So, instead of throwing away food, donors feel happy knowing it's going to someone who really needs it. They can easily arrange for someone to pick up the food they want to donate.

- The website also keeps track of all the donations. This means everyone can see where the food is going and how it's being used. By looking at this information, people can figure out better ways to share food and make sure it's helping as many people as possible. Overall, this website is a shining example of people coming together to solve big problems and make the world a better place.

Food Donation Web App

Description

This website can be very useful to provide the food to people in need. The donator will put the required details of the donation then it will be displayed to the servicer and then the food will reach to the people who really needs it.

Functionalities:

1. Different login Interfaces:

- Distinct login options for Donator and Servicer.

2. Donation tracking:

- Allowing users to track the status of their donations from listing creation to pickup or delivery confirmation.

3. Donation listings:

- Enabling food donors to list surplus food items with descriptions, quantities, and expiration dates.

4. Communication tools:

- facilitating between donors and recipients to coordinate pickup or delivery details.

5. Scheduling and logistics:

- Allowing users to schedule pickup or delivery times and locations.

Technologies: React, Firebase.

Tools: Visual studio code, GitHub.

FUTURE ENHANCEMENT:

In the coming time we will try to make the we app which will be very user friendly to the people using it and will make the leaderboard in which we can see the the people donated the most and will also work on the images upload by the srvicer of the needy people getting the food.
